## Summary

A product design leader with 15 years of experience, I work quickly and efficiently, iterating through multiple ideas and gathering feedback from engineering, product management, and design.

I design elegant solutions for complex enterprise software, working hard to understand pain points by talking directly to customers. I manage design teams, big or small, still thriving as an individual contributor.

## Education

### Georgetown University

Bachelor of Arts in Psychology, *cum laude*

## Experience

Currently leading design efforts at Monte Carlo, a data observability platform.

### Workato

Staff Product Designer

Oct 2021 - April 2022

Expanded customer base by designing solutions for a low-code application platform.

### Tanium

Senior Product Designer

Nov 2019 - Oct 2021

Supported several product modules: Asset, Assurance, Discover, Enforce, Impact, Prevent, and Threat Response.

Overhauled top-selling security module to prevent customer churn.

### Pendo

Lead Product Designer

Feb 2019 - Nov 2019

Coordinated and led design across three significant efforts: enterprise readiness, feedback collection, and platform integrations.

**Red Hat**

Senior Interaction Designer

Nov 2016 – Feb 2019

Led product design for the Business Automation suite.

Contributed design patterns to PatternFly, an open-source design system.

**SAS**

Principal Interaction Designer

Jan 2011 – Nov 2016

Designed products in Advanced Analytics, Business Intelligence, Fraud, and Risk.

Served as lead designer from product conception to market delivery for two products: Factory Miner and Visual Statistics.

**Thomson Reuters**

Lead Interaction Designer

May 2010 – Jan 2011

Designed corporate blogs for international audiences and redesigned critical components of the enterprise-wide intranet.

**HumanCentric**

Product Design Manager

Jan 2006 – May 2010

Managed a multidisciplinary team of designers working with enterprise clients like LexisNexis, Kodak, Motorola, and BBC.

Led product design, email marketing, usability testing, and front-end development.

**Frog**

Associate Interaction Designer

Jan 2004 – Jan 2006

Designed various projects for industry-leading clients, including a touch screen thermostat, an HP kiosk, HP desktop photo management software, and Microsoft web properties.
